

```
1 #include <stdio.h>
2
3 int main() {
4     int n, i;
5
6     printf("Enter number of elements: ");
7     scanf("%d", &n);
8
9     int arr[n];
10
11     printf("Enter the elements:\n");
12     for(i = 0; i < n; i++) {
13         scanf("%d", &arr[i]);
14     }
15
16     int largest = arr[0];
17     int smallest = arr[0];
18
19     for(i = 1; i < n; i++) {
20         if(arr[i] > largest)
21             largest = arr[i];
22         if(arr[i] < smallest)
23             smallest = arr[i];
24     }
25
26     printf("Largest = %d\n", largest);
27     printf("Smallest = %d", smallest);
28
29     return 0;
30 }
31
```

Enter number of elements: 5
Enter the elements:
5
11
76
34
6
Largest = 76
Smallest = 5
=== Code Execution Successful ===

Page:

1. Write a program to find largest & smallest number.

```
#include <stdio.h>
int main() {
    int n, i;

    printf("Enter number of elements: ");
    scanf("%d", &n);

    int arr[n];

    printf("Enter the elements: \n");
    for (i = 0; i < n; i++) {
        scanf("%d", &arr[i]);
    }

    int largest = arr[0];
    int smallest = arr[0];

    for (i = 1; i < n; i++) {
        if (arr[i] > largest)
            largest = arr[i];
        if (arr[i] < smallest)
            smallest = arr[i];
    }

    printf("Largest = %d\n", largest);
    printf("Smallest = %d\n", smallest);

    return 0;
}
```

Output:

Enter the number = 5
Enter elements =
5
11
76
34
6
Largest = 76
Smallest = 5
